5 Platinions contributed insights through a keynote, panel discussion and networking dinner

## Online Class

# We are different

We are independent and nimble enough to put client value and needs above anything else

We always put technology into a business context - and with that enable meaningful board-level discussions

We work in interdisciplinary teams with BCG and are committed to the same quality standards and dedicated, effective working method

We always and explicitly try to enable our clients in building up important capabilities

# BCG Platinion supports digital transformation globally

**650+**  
Employees  
worldwide

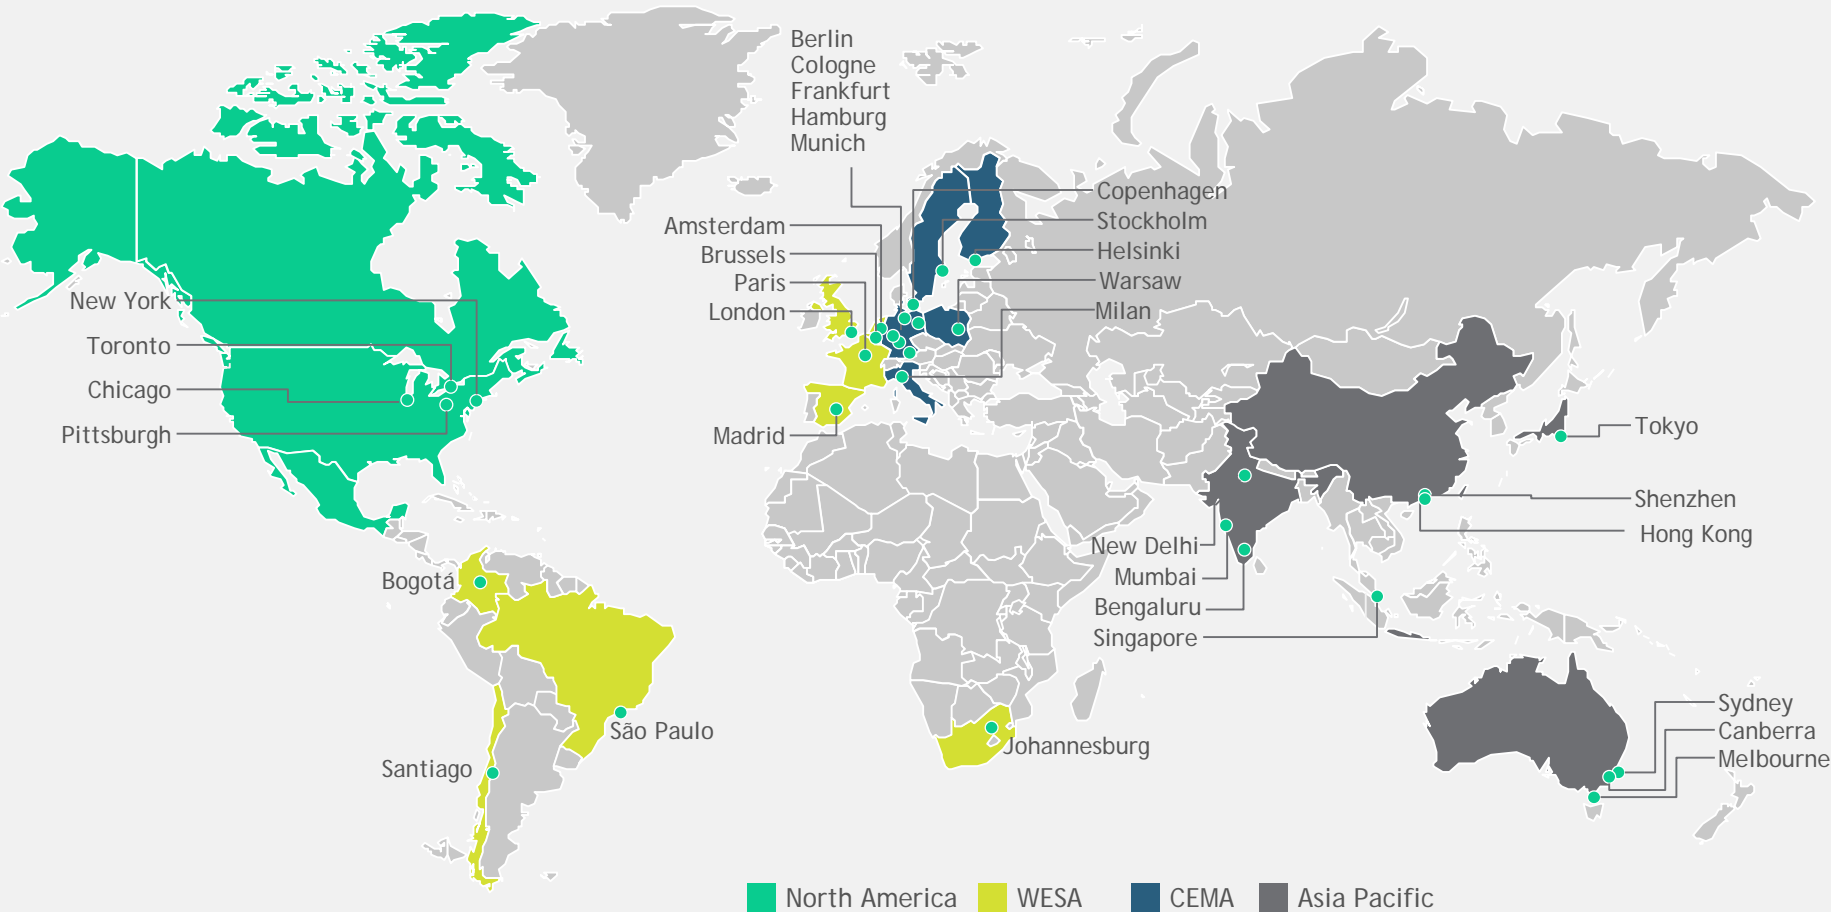

**33**  
Offices  
worldwide

**1,800**  
Delivered projects  
worldwide

**>800**  
clients in our core  
industries

# Our three deep tech propositions cluster seven capabilities

## Digital Products & Services

### Digital Design

Design engaging experiences and solutions, including customer journeys, based on understanding users through ethnography and prototyping

### Engineering

Develop user interfaces, proof-of-concepts, & MVPs; build data & digital platforms to enable digital customer experiences and enterprise agility

### Product Management

Continuously discover, design, and deliver products that meet business needs and customer expectations; build, train and lead product teams

## Architecture & Platforms

### Architecture

Help clients design and migrate to next generation architectures and modernize their legacy platforms, enterprise apps, infrastructure, and data architectures

### Enterprise Solutions

Define and implement sustainable Enterprise Solution architectures, de-risking the implementation and ensuring a proper business case

## Enabling Digital Capabilities

### Agile Delivery

Manage large IT programs at scale and in agile ways; change business and tech operating models through Agile coaches and DevOps experts

### Cybersecurity

Deliver comprehensive cybersecurity strategies and respective organizational and technical solutions
